

PRESS RELEASE

Saskatoon, SK, Canada - November 3, 2010 - Comco Manufacturing Ltd. is pleased to announce it has acquired the technology to manufacture the Comptrol "Momentum" dry flow monitoring system. Comco has utilized Momentum dry flow devices in its automation systems for many years and knows first-hand of their reliability and accuracy.

By manufacturing dry flow technology in house, Comco believes it will be able to offer its customers the most reliable and cutting edge dry flow measurement technology at a very competitive price. Willie Unger, President of Comco Manufacturing Ltd., remarked that "Adding a dry flow device to Comco's product line-up will ensure our customers are receiving the best possible service and support for dry flow measurement. This gives us the opportunity to expand our market share with these products, as it will be useful to many different industries and companies."

Len Vienneau of Comptrol Technologies Inc. commented that "I am pleased knowing that Comco can supply both excellent customer service and manufacturing capabilities to my former customers. Comco is the ideal company to provide dry flow measurement devices as it is already a leader in providing advanced automation systems to its clients."

About Comco:

Comco designs and builds electrical control and automation systems for companies that operate in the grain, animal feed, mining, and material handling industries.

Comco's automation software division develops and implements automation solutions for clients in the animal feed and grain industries. Our products allow our clients facilities to run with decreased labour costs, increased efficiency, and maximized production time. We also develop custom packages for a variety of automation applications such as machine automation.

Our global systems division develops state of the art systems such as liquid and dry ingredient application systems. These systems are accurate and stable while allowing for low inclusion rates.

With over 20 years of experience, Comco's team of engineers, technicians, installations and service and support have built a worldwide customer base.

Comco's head office is located in Saskatoon, Sask. Canada with sales and support locations in the USA.
