Starter Panels

Capacitor Autobanks

Soft Start Enclosures

Centralized Distribution
Panels

Variable Frequency
Drive Enclosures

Comco has been manufacturing electrical panels for over 30 years. Our custom production facility has the ability to manufacture a variety of panels.

- Design, layout and prewire of MCC sections to PLC Panels
- Vendor independent
- Comprehensive testing completed prior to shipping
- Prewired cables are coiled for easier installation on site

Drawings and Design

Starting at the design phase Comco has the ability to work with our clients to design control panels that will meet your needs. We will work with your team to generate drawings that are ready for construction. We can consult in the areas of power systems, distribution, instrumentation, sensors, and controls.

CSA

Our panels are built to the highest industry standards. Our production facility is CSA approved, giving us the ability to build equipment for the most sensitive facilities and processes.
