

**Comco** can provide custom programming solutions for your facility and equipment. Working with the latest development tools and state of the art platforms including Rockwell and Ignition, Comco's team of professionals can assist you in designing, building, and implementing automation systems to keep your facility running at peak efficiency.

Comco has designed and implemented systems for a variety of applications including:

- Port Importing/Exporting Facilities
- Grain Terminals
- Sand and Gravel Crushing/Sorting Yards
- Manufacturing Plants
- Pre Fabrication Plants

## Remote Monitoring

Know what happens in your facility even when you're not on site. Helm offers state-of-the-art monitoring from remote locations, giving you control and peace of mind.

## Support

Comco offers 24/7/365 North American based telephone support for users included in the first year after purchase.

After the first year, we offer support contracts that are flexible and affordable.
